1) Select target data table from "Search Target".
2) Enter keywords to search.
3) Click the "Search" button or press Enter key, run a search.

There are 5 types of Advanced searches.

① Search Bibliography : Individual materials.

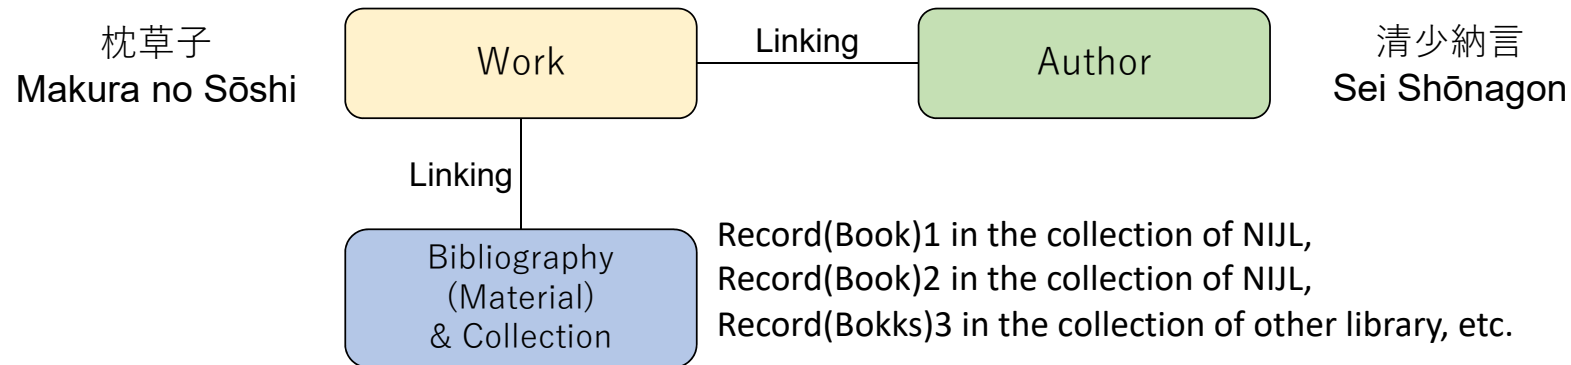

② Search Work : Work. ③ Search Author : Writer, Anthologist, etc.

④ Search Image : Tags assigned to images. ⑤ Search Text : Text data in materials.

2 Relationship in the database.

Relationship in the database between Bibliographies and Works and Authors is shown in the figure below.

Records of Bibliography (Material) link to authority records of Work. Authority records of Work link to authority records of Author.

Authority records of Work from “国書総目録(Kokusho Sōmokuroku)” include information of Bibliography and Collection. Many of those records are not linked to record of Bibliography. In some cases, Works created after Meiji period are not recorded as authority record. So those materials only exist as records of Bibliography.

To search without leaks, it is necessary to search in both Search Bibliography and Work.
